

Product Requirements Document (PRD)

FinPath

Your personalized path to financial freedom

Version: 1.0

Author: Srijani D

Product Category: Personal Finance & Wealth Management

1. Executive Summary

FinPath is an AI-powered financial decision platform designed to help individuals transform life goals into personalized financial strategies.

Rather than focusing solely on investing, FinPath enables users to understand their financial position, define meaningful goals, receive personalized guidance, and make informed financial decisions through explainable recommendations, financial coaching, and scenario planning.

By combining AI-driven insights, behavioral analytics, financial planning, and product intelligence, FinPath aims to simplify personal finance and help users confidently progress toward financial freedom.

2. Why FinPath?

Financial planning today is fragmented across budgeting tools, investment platforms, spreadsheets, and financial advisors. Users often struggle to connect daily financial decisions with long-term goals.

Most financial products focus on transactions and investment products rather than helping users achieve meaningful outcomes.

FinPath addresses this challenge by providing a unified financial decision-support platform that combines goal planning, personalized strategy generation, financial coaching, behavioral insights, and progress tracking in a single experience.

3. Problem Statement

Millions of individuals want to improve their financial future but struggle to:

- Understand investing
- Build financial plans
- Connect investments to personal goals
- Track progress toward goals
- Make confident financial decisions

As a result, users experience decision paralysis, inconsistent investing behavior, and low confidence in financial planning.

There is a need for a platform that prioritizes financial outcomes rather than financial products.

4. Market Opportunity

The democratization of investing has made financial products more accessible than ever before. However, access alone does not solve the problem of financial decision-making.

Many users still struggle to answer questions such as:

- Am I financially healthy?
- Am I saving enough?
- Can I achieve my goals?
- What should I do next?

FinPath addresses this gap by focusing on personalized financial decision-making rather than investment execution.

5. User Research Insights

Research conducted through interviews with students and working professionals revealed the following:

Key Findings

- Users think about goals more than investments.
- Financial terminology creates confusion.
- Users prefer guidance over raw financial data.
- Trust increases when recommendations are explained.
- Most users lack confidence in financial decisions.
- Users want personalized financial planning rather than generic advice.

6. Target Users & Personas

Persona 1: Beginner Investor

Age: 18–30

Characteristics:

- Limited financial knowledge
- Interested in wealth creation
- Requires guidance and education

Pain Points:

- Doesn't know where to start
 - Afraid of making financial mistakes
-

Persona 2: Goal-Oriented Planner

Age: 22–40

Characteristics:

- Focused on future milestones
- Wants structured planning

Pain Points:

- Unsure how much to save
 - Unsure whether goals are achievable
-

Persona 3: Busy Professional

Age: 25–45

Characteristics:

- Stable income
- Limited time for financial research

Pain Points:

- Wants simplified financial guidance
 - Needs progress tracking
-

7. Product Vision

To become the intelligent financial companion that guides users from financial uncertainty to financial freedom through personalized planning, actionable insights, and explainable recommendations.

8. Product Differentiation

FinPath differentiates itself through the following principles:

Goal-First Financial Planning

Most financial platforms focus on investments.

FinPath focuses on outcomes.

Explainable Recommendations

Every recommendation includes transparent reasoning, benefits, risks, and goal alignment.

AI Financial Coaching

Users receive ongoing financial guidance rather than one-time recommendations.

Behavioral Decision Intelligence

Financial decisions are tracked and analyzed through the Decision Journal.

Scenario-Based Planning

Users can explore future possibilities through simulation instead of relying on static recommendations.

9. Business Objectives

Primary Objectives

- Simplify financial decision-making
 - Improve financial confidence
 - Enable goal-based planning
 - Provide explainable financial guidance
-

Secondary Objectives

- Increase user engagement
 - Encourage long-term financial discipline
 - Improve financial awareness
 - Create personalized user experiences
-

10. Success Metrics

North Star Metric

Percentage of users actively progressing toward at least one financial goal.

Supporting Metrics

Activation

- Onboarding Completion Rate

Engagement

- Daily Wealth Brief Views
- AI Financial Coach Interactions

Conversion

- Goals Created
- Financial Strategies Generated

Retention

- Weekly Returning Users

Satisfaction

- Recommendation Acceptance Rate
 - Recommendation Satisfaction Score
-

11. Feature Prioritization

Prioritization Framework

Features are prioritized based on:

- User Impact
 - Business Value
 - Technical Feasibility
 - Development Effort
-

Feature	User Impact	Effort	Priority
Smart Financial Discovery	High	Medium	P0
User Segmentation Engine	High	Medium	P0
Goal Planning Engine	High	Medium	P0
Financial Strategy Builder	High	High	P0
Recommendation Explainability	High	Medium	P0
Financial Health Score	High	Medium	P0
AI Financial Coach	High	Medium	P0
Daily Wealth Brief	Medium	Low	P1
What-If Simulator	High	Medium	P1
Decision Journal	Medium	Low	P1
Recommendation Feedback System	Medium	Low	P1
Product Analytics Dashboard	Medium	Medium	P2

12. Product Scope

Core Capabilities

- Smart Financial Discovery
 - User Segmentation Engine
 - Goal Planning Engine
 - Financial Strategy Builder
 - Recommendation Explainability
 - Financial Health Score
 - AI Financial Coach
 - Daily Wealth Brief
 - What-If Simulator
 - Decision Journal
 - Recommendation Feedback System
 - Product Analytics Dashboard
-

Future Opportunities

- Portfolio Import
 - Open Banking Integration
 - Family Financial Planning
 - Advisor Marketplace
 - AI Budget Management
 - Automated Wealth Management
-

13. Functional Requirements

Module 1: Smart Financial Discovery

Purpose: Build a comprehensive financial profile.

Inputs:

- Age
- Country
- Occupation
- Income
- Expenses
- Savings
- Debt
- Investment Experience

- Risk Appetite
- Financial Goals

Outputs:

- Financial Profile
 - User Segment
 - Personalized Insights
-

Module 2: User Segmentation Engine

Purpose: Classify users into meaningful financial personas.

Segments:

- Beginner Explorer
- Goal Planner
- Passive Builder
- Growth Investor

Outputs:

- Personalized recommendations
 - Tailored coaching
-

Module 3: Goal Planning Engine

Purpose: Help users define and evaluate financial goals.

Goal Types:

- Retirement
- Home Purchase
- Education
- Emergency Fund
- Travel
- Custom Goals

Outputs:

- Goal feasibility analysis
 - Monthly contribution requirements
 - Goal success probability
-

Module 4: Financial Strategy Builder

Purpose: Generate personalized financial strategies aligned with goals and risk profiles.

Strategy Components:

- Stocks
- ETFs
- Bonds
- Gold

Outputs:

- Asset allocation
 - Suggested contribution amounts
 - Diversification plan
-

Module 5: Recommendation Explainability

Purpose: Build user trust through transparency.

Each recommendation must explain:

- Why it was selected
 - Expected benefits
 - Associated risks
 - Goal alignment
 - Impact on financial health
-

Module 6: Financial Health Score

Purpose: Provide a simple measure of financial well-being.

Factors:

- Savings Health
- Emergency Fund
- Debt Management
- Goal Progress
- Diversification
- Strategy Alignment

Output:

Score out of 100 with actionable improvement suggestions.

Module 7: AI Financial Coach

Purpose: Act as a personalized financial guide.

Capabilities:

- Goal coaching
 - Savings recommendations
 - Risk awareness
 - Strategy optimization suggestions
-

Module 8: Daily Wealth Brief

Purpose: Increase engagement through actionable daily updates.

Contents:

- Financial Health Score
 - Goal Progress
 - Strategy Status
 - Recommended Actions
 - Financial Insight of the Day
-

Module 9: What-If Simulator

Purpose: Enable scenario planning.

Variables:

- Monthly Contributions
- Goal Timelines
- Risk Levels
- Savings Rates

Outputs:

- Updated projections
- Goal success probability
- Strategy changes
- Health score changes

Module 10: Decision Journal

Purpose: Track user financial decisions.

Stored Data:

- Recommendation
- User Action
- Timestamp
- Notes

Benefits:

- Behavioral tracking
- Decision reflection
- Recommendation effectiveness analysis

Module 11: Recommendation Feedback System

Purpose: Collect user sentiment and recommendation quality insights.

Rating Scale:

1–5 Stars

Outputs:

- Recommendation Satisfaction Score
- Feedback Analytics

Module 12: Product Analytics Dashboard

Purpose: Measure product performance and user engagement.

Metrics:

- User Registrations
- Onboarding Completion
- Goals Created
- Strategies Generated
- Recommendation Acceptance Rate
- Satisfaction Score

14. User Journey

User Registration

Financial Discovery

Financial Persona Generation

Goal Creation

Financial Strategy Generation

Recommendation Review

Daily Wealth Brief

What-If Simulation

Decision Journal Updates

Recommendation Feedback

15. Technical Architecture

FinPath is built using a modern web architecture consisting of:

- Frontend interface for onboarding, planning, and financial insights
 - Backend services for user management and recommendation generation
 - Database layer for storing user profiles, goals, decisions, and analytics
 - AI layer powering personalization, coaching, explainability, and strategy generation
 - Analytics layer for tracking engagement and recommendation effectiveness
-

16. Product Constraints

Compliance

Recommendations are presented as educational guidance rather than financial advice.

Trust

All recommendations must be explainable.

Simplicity

Users should be able to generate a financial strategy within minutes.

Personalization

Recommendations must adapt to user goals, financial profiles, and risk tolerance.

17. Risks & Mitigation

Risk

Low user trust.

Mitigation

Explainable recommendations and transparent assumptions.

Risk

Poor recommendation quality.

Mitigation

Feedback collection and continuous improvement.

Risk

Financial compliance concerns.

Mitigation

Position guidance as educational support rather than investment advice.

18. Product Roadmap

Version 1

Core Financial Planning Platform

- Financial Discovery
 - Goal Planning
 - Financial Strategy Builder
 - Financial Health Score
 - AI Financial Coach
-

Version 2

Expanded Financial Visibility

- Portfolio Import
 - Open Banking Integration
 - Advanced Goal Planning
-

Version 3

Connected Financial Ecosystem

- Family Financial Planning
 - Advisor Marketplace
 - AI Budget Management
-

19. Expected Impact

User Impact

- Increased financial confidence
 - Improved goal achievement
 - Better financial awareness
 - More informed financial decisions
-

Product Impact

- Strong engagement
 - Personalized user experiences
 - Improved recommendation quality
 - Increased user retention
-

Educational & Professional Impact

FinPath demonstrates:

- Product discovery and user research
- Product strategy and prioritization
- AI-powered personalization
- Analytics-driven decision-making
- Behavioral insights and recommendation systems
- End-to-end product ownership

FinPath is designed not as an investment application, but as an intelligent financial decision platform that helps users confidently navigate their path toward financial freedom.
